

VisNET:

The role of online networking & collaboration in closing the gender gap in academic STEM

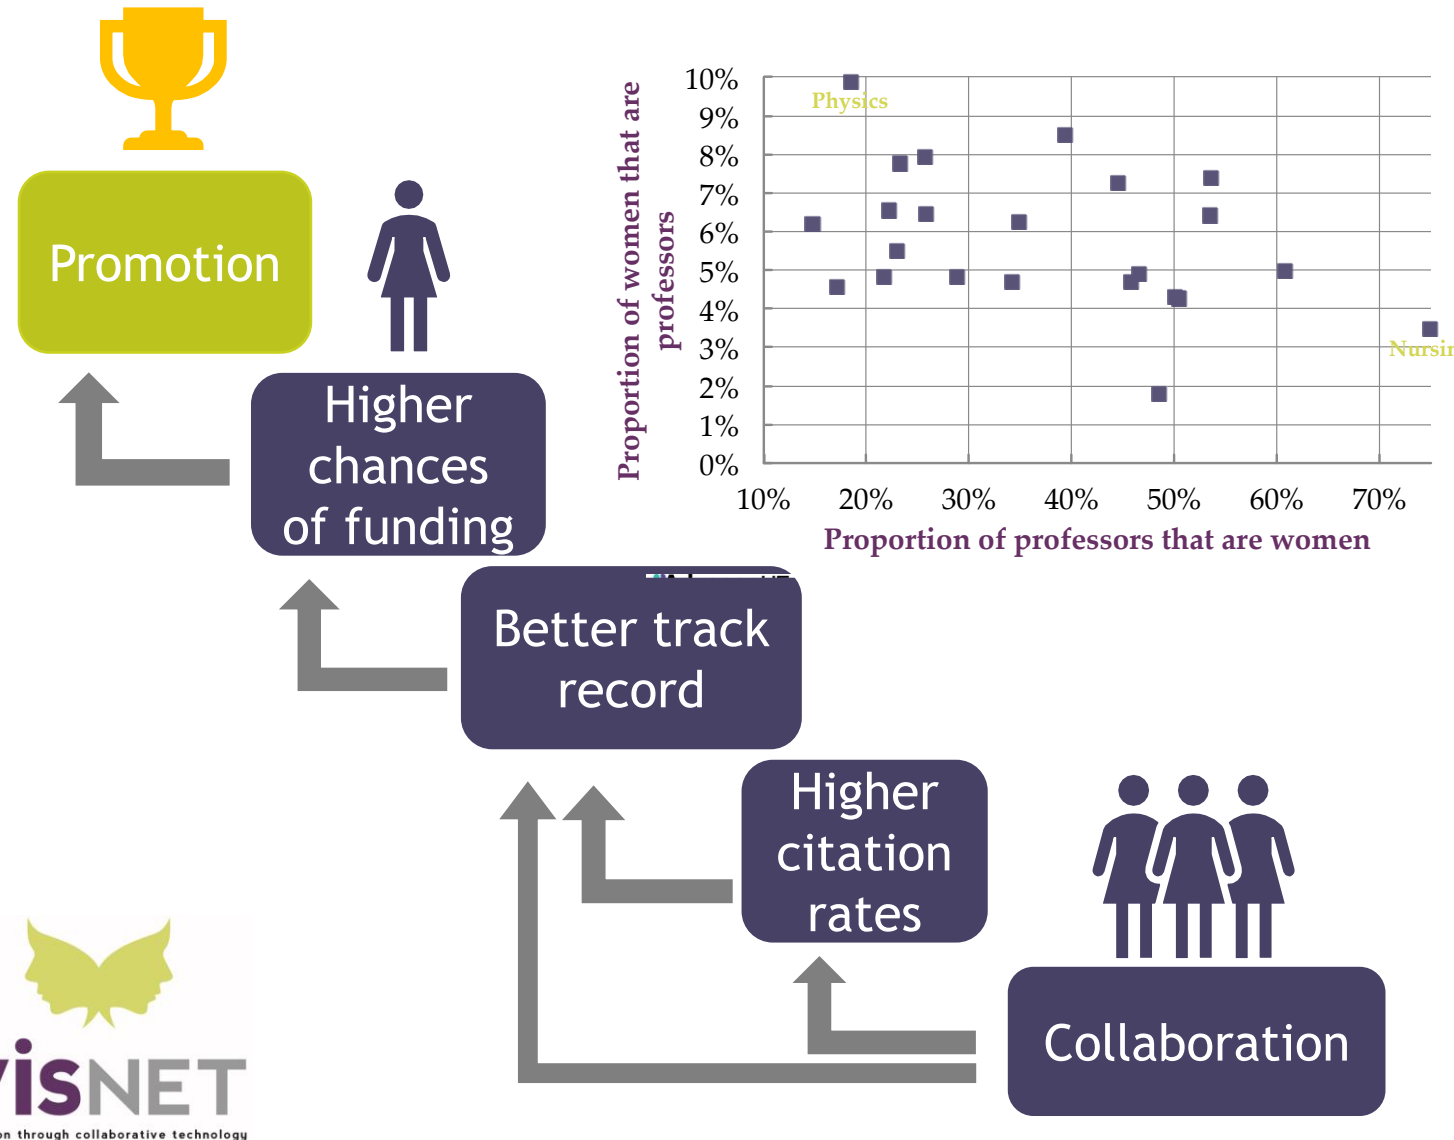

Dr Carla Cebula, Dr Caroline Gauchotte-Lindsay, Dr Helen Mulvanda
Prof Catherine Lido & Prof Nicki Hedge
& the VisNET Team

There is a gender attainment gap in STEM

GRADE OF ACADEMIC STAFF IN ENGINEERING
University Of Glasgow (2016)

And networks & collaboration are important for promotion

Data Collection

Year 1 (June, 2019)-

Motivational interviews

- Research climate
- Conference attendance
- Work-life balance
- Collaboration
- Survey
- Social network maps
- Digital footprint

Year 2 (End 2019/ Start 2020)

Survey

- Social network maps
- Digital footprint
- Collaboration Event feedback

Time point 3 (End 2020/ Start 2021)

Motivational interviews

- Survey
- Social network maps
- Digital footprint

Barriers to Networking and Collaboration

Perceived barriers

- Low confidence connecting with senior academic staff
 - Imposter syndrome
- Travel for parents & those with health conditions
- Poor work-life balance - networking vs time

Hidden barriers

- STEM understanding of networks
 - Filling knowledge gaps
 - Subject silos
 - Hierarchy

Participants

30 women STEM
Early Career
Researchers at

Longitudinal Mixed Methods

Incl. Ego Nets @ 3 time points

A. reliance on
manager's
networks

B. Clustering in
lab/group

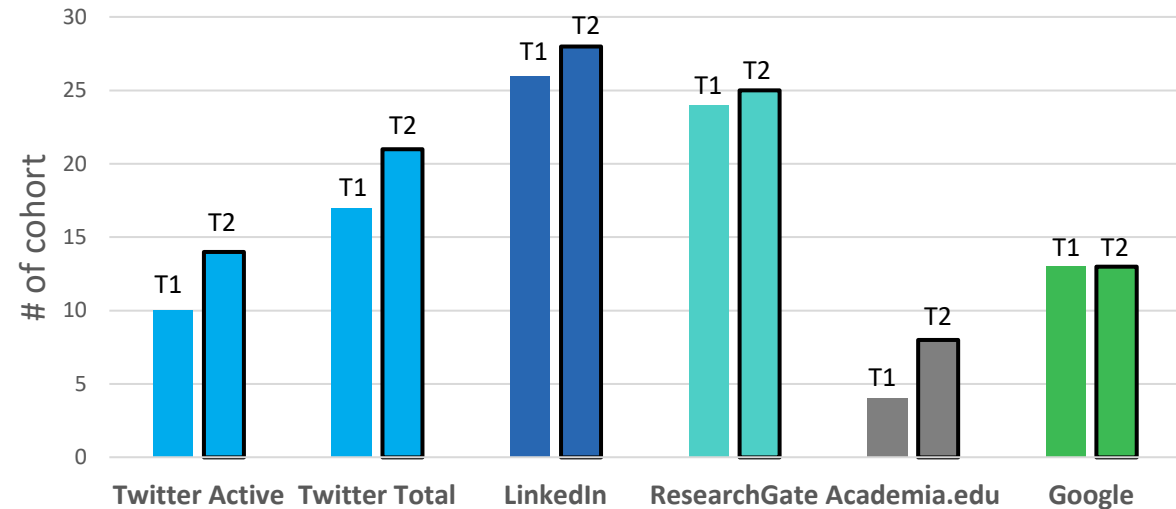

C. Many
unconnected
individuals

Time 2 Findings

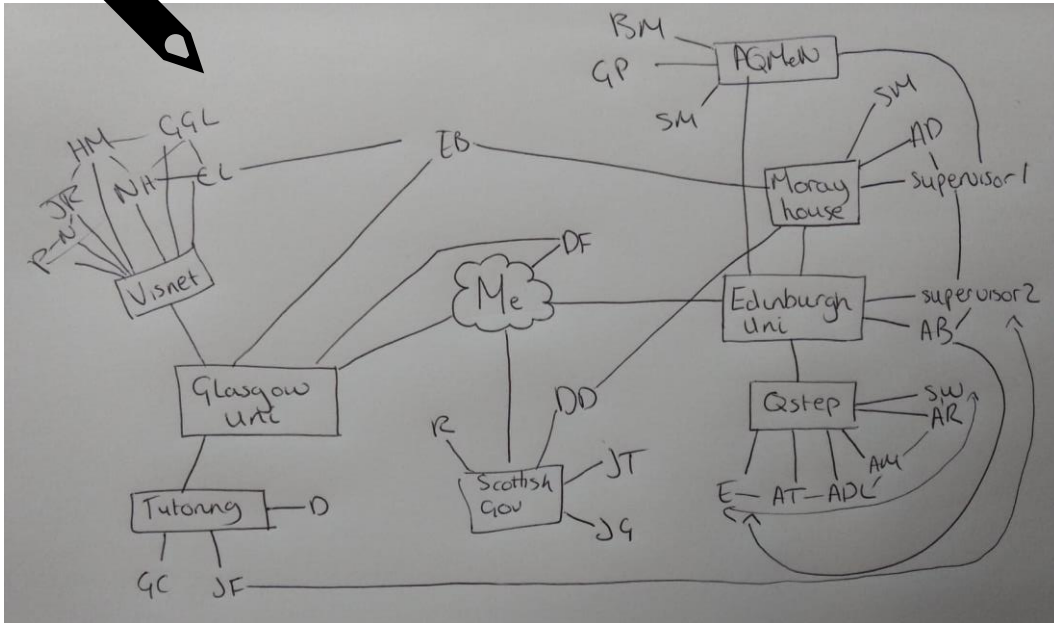

- Networks
 - Size sig. increase
 - Density sig. decrease
 - Subject Siloing
 - Hierarchy - networking up
- Increased activity on digital tools
 - Including more up to date
- Increased confidence in self & use of tools to develop their online presence

Figure 6: Digital Tools Usage T1 to T2

How can YOU overcome these barriers?

Thinking strategically!...

*This was my network back in Nov 2019!

- Draw & Audit your network
 - Breadth: Strong relationships with a diverse range of contacts
 - Connectivity/brokerage: the capacity to link or bridge across people and groups that wouldn't otherwise connect
 - Dynamism: A dynamic set of extended ties that evolves as you evolve

(Ibarra, 2015)

Breadth

- Women tend to have less broad international networks

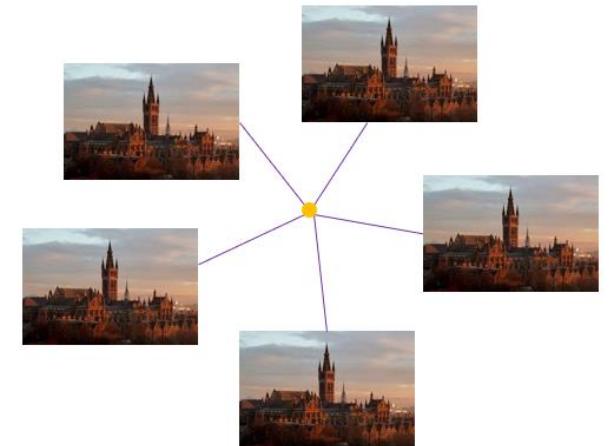

...some pot holes

- We like to think of ourselves
- Don't rule people out
 - Seniority
 - Academic vs Support staff
 - Across fields

“Brokers are the ones who connect people from different groups and who have access to non-redundant information that the members of other groups are not aware of. As a result, brokers are in an advantageous position.” (Schoen et al, 2018)

Relying on the networks of others

Making use of online networking and collaboration

- Break down barriers
 - Physical distance
 - Discipline
 - The hierarchy!
- Reduce time
- They are there when you are not
- Informal
- Different platforms for different information
- Give it a bash!
